HEALTH AND WELFARE

AIMS

All members of staff are committed to promoting and safeguarding the welfare of all pupils at the school. We aim to provide a caring and attractive environment, where each child is supported and encouraged to succeed by the ethos of the school. There is a fostering of positive attitudes and feelings, such as self-confidence, self-esteem, independence, responsibility and the care and consideration of others. This document explains the roles and procedures adopted by the school to assist in keeping children healthy and safe.

STAFF WITH PARTICULAR CARE RESPONSIBILITIES

- Mr Wells is the Headmaster and has overall responsibility for all the children and staff in the school. He will ensure that the balance of curriculum alongside sport, activities and leisure time are suitable for children in each age group. He will also ensure that only staff with enhanced DBS checks are appointed, who will support the school ethos and who will promote and safeguard pupil welfare and learning. Mr Wells is the school's Designated Person for Child Protection (DSL).
- Mrs Cochand is the Deputy Head (Pastoral) and co-ordinates our PSHEE programme called 'Lifeskills' and will include health and welfare advice, education and promotion within the 'Lifeskills' curriculum.
- Mrs Rowntree is Head of Boarding and has overall responsibility for boarders. She is also the resident house parent for the girl boarders.
- Miss King is the resident boys' house parent.
- Miss Brown is Head Matron and leads the Matrons' department.
- Nurse Parrett is the School Nurse and the medical lead for the health of all pupils.
- Mr Peak is Deputy Head (Academic) and is in charge of discipline.

In addition, other staff will support pupil welfare in the evenings or at weekends.

Most boarding pupils are registered at the Fordingbridge Surgery. If a child needs to see a Doctor, the Matrons department will contact the surgery and arrange for them to have an appointment. A child may see the doctor in private or a female doctor can be arranged if they wish. If parents of boarders prefer, they can continue to take their child to their home GP but the school cannot undertake to do so. FSM recognises and acknowledges the child's wishes and their competence to consent to treatment.

ACCIDENT, ILLNESS OR INJURY OF A PUPIL

- In school, the School Nurse or Matrons will administer first aid and over the counter remedies may be used including paracetamol, if parents have given consent. Younger children will be accompanied to see matron by a friend or adult, as appropriate. If there is a major incident (eg. lacerations, broken bones, head injury) the child will not be moved unless there is risk of further injury and the School Nurse / Matron will assess whether to take the child to casualty or a GP, or to call for an ambulance. An ambulance should be called if the condition is life threatening or the School Nurse / Matrons decide an ambulance is required. The child will be accompanied to hospital and will stay until a parent arrives. In certain cases, eg. on a school trip, or in an emergency the supervising adult may need to administer first aid if qualified and competent to do so. Notifiable injuries and diseases will be reported to the relevant authorities as required.
- If there is any doubt about the treatment or course of action a medical opinion should be sought. This includes the School Nurse, GP, or the Emergency Department. Any member of staff or parent may request this if they feel that it is required. However, in all other matters the School Nurse / Matron's decision will be respected (eg. decisions about a child being on, or off, games).

IF ILLNESS ARISES WHILST AT HOME

Parents are requested to keep their child at home whilst it is in their child's best interest to do so, or the best interest of other pupils at the school. Please see the recommendations for infectious diseases. Parents should keep the school office informed while their child is absent both with the nature of the illness and with the expected time off school. On the child's return to school any special requirements for medication, games or diet should be given to the Matrons' department, and the appropriate forms completed.

RECORDING AND COMMUNICATING

Health and welfare matters are co-ordinated by the School Nurse, Head Matron and the Head of Boarding and detailed confidential records are kept of all treatments and related matters for all pupils until they are aged 25. Welfare notes that may assist in the care of pupils are made available on a 'need to know' basis to staff. Weekly staff meetings enable any concerns and welfare issues to be discussed. All significant incidents of a medical nature are reported to a child's parent or carer together with information of any medication given or further treatments advised. Parents are encouraged to contact the school should they have any concerns. School telephone lines are open at all times and both a Matron and the Head of Boarding can be contacted after office hours.

OFF GAMES

Children may be put "off games" by a parent/carer or by the School Nurse / Matron. Please inform the school office the length of time to be off, and the type of sport to be excluded.

GETTING BETTER BAY

Pupils who are unwell may rest in the 'Getting Better Bay' with bathroom, TV and TLC until they are collected by parents or get better, whichever is soonest! They will be cared for by a matron with medication, drinks and snacks as appropriate. The Getting Better Bay consists of two individual bedrooms, in order to separate the genders. Matrons can be contacted at any time from the Getting Better Bay by the use of the red phone.

MEDICAL AND SOCIAL PROFILE

This form is completed for all new pupils and should contain anything that may be relevant to promoting the child's health and welfare whilst at school. Parents are requested to complete an update annually to ensure that information held is up to date. This information is confidential but may be used on a 'need to know' basis. Further information which may arise may be brought to the attention of staff and, if appropriate, information may be given to parties outside the school eg. another school may be informed if a child has a nut allergy. If a parent or child wishes, any information may be kept private unless this risks their health or welfare.

SPECIAL REQUIREMENTS

Children with specific requirements for diet, health, disability, behaviour, race or language will be accommodated where practicable. Their needs will be discussed individually and if required an individual health and welfare care plan will be implemented. Please note we are a **NUT FREE** school.

MEDICATION: ADMINISTRATION AND STORAGE

- **All medication** brought to school, both over the counter remedies and prescribed drugs, must be given to the Matrons' department together with written instructions indicating complaint, name, dose and time (please complete Medicines Form A). Occasionally children may 'self-medicate' when it is in their interests to do so (e.g. with inhalers) and with specific permission from the School Nurse / Matron and their parent. (Please complete Medicines Form B).
- Medicines will be kept in original containers locked in the drug cupboard in the surgery and will be administered by the School Nurse or one of the matrons unless pupils are on a school trip when another member of staff, who has at least completed a first aid qualification and is competent to give medication, may be required to do so. Controlled drugs will be stored and recorded separately. All pupils medication should be collected at the end of the course/term or it will be disposed of.
- The School Nurse and Matrons will administer first aid and routine over the counter medications as required. A list of over the counter remedies used is available on request and is in the Administration of Medication policy.
- Medicines will be administered and recorded according to the following checks: GP or parent instructions, reason for administration, contra-indications, name, dosage, date, time.

IMMUNISATIONS AND VACCINATIONS

Influenza vaccinations are offered to boarders with immuno-deficiency disorders in November each year. Travel vaccinations can also be arranged for registered boarders.

The Human Papillomavirus vaccine (HPV) is offered to pupils aged 12 to 13 years (school year 8). This is administered by the NHS at school with written permission from parents. For more information about this vaccine log on to www.immunisation.nhs.uk/hpv.

DENTISTS AND OPTICIANS

Routine appointments for dentists and opticians should be arranged for holiday periods. Overseas boarders can sometimes be accommodated in the Fordingbridge practices but there may be a waiting list.

HEALTH AND HYGIENE

All pupils are supervised by games staff in the changing rooms and are provided with individual shower cubicles and lockers for clothing. Changing times are staggered so that younger pupils can get changed first. Day pupils are expected to take dirty clothing home as required and at least weekly. Matrons organise and wash boarders' clothing and supervise the bath-time routine. Boarders may choose a bath or a shower and matrons will be on hand to help with hair washing. Pupils are encouraged to take responsibility for their hygiene and clothing and to respect the privacy of others. Parents are asked not to enter the changing rooms except before 8.55am each day, and at the beginning and end of each term.

BOARDING ACCOMODATION

All boarders sleep in bedrooms with pupils of a similar age and are expected to show consideration for others sharing this living space. Resident and duty staff keep a close eye on relationships, tidiness and sleep. Day pupils are not allowed in the bedrooms, unless given permission by a matron. Parents are asked not to enter the bedrooms without permission except at the beginning and end of each term, a sleep-out weekend or on a Monday morning.

This policy is complemented by the following school policies which also refer to health and welfare issues:

- Child Protection.
- Anti-Bullying.
- Catering at FSM.
- Discipline.
- Worries and Complaints.
- Health and Safety.
- Boarding at FSM.
- The Administration of Medication.
